# Hemlocks

You love these native hardy evergreen trees for their grace and elegance, for their compelling interest 'round the year. The slender sweeping branches, growing right down to the ground, the rich dark evergreen foliage with dainty pendant cones, and the magnificent dignity of their height when fully-grown, make them the aristocrats of the world of conifers.

Canadian Hemlocks (*Tsuga canadensis*), with their softly waving boughs, are particularly graceful and adaptable, as specimen evergreens on your lawn, as a hedge, or for woodland plantings. You will enjoy them most, however, when grouped with *flowering trees and shrubs and*

*berry-bearing bushes*, for then their deep evergreen foliage and stately contours create a perfect background for Nature's gifts of color.

Andorra's landscape architect has designed for you *four perfect groupings*—to give a lovely vista, to form a beautiful natural screen, or to frame a distant view. But you will surely find the exact place on your grounds for these gracious groups of ever-changing, everlasting loveliness. These groups, described on the next page, are offered to you at **VERY SPECIAL VALUES**. They should be planted Now.

## *Andorra Nurseries, Inc.*

Wissahickon Drive at Northwestern Avenue,  
Chestnut Hill, Philadelphia.

(Easily reached from Ridge Ave. or Germantown Ave.)

Telephone  
Chestnut Hill 4200

Canadian Hemlock (*Tsuga canadensis*) is the Hemlock designated in these groups. If you prefer the Carolina Hemlock (*Tsuga caroliniana*), which is more compact and dense of foliage, will you please so indicate? *The enclosed card is for your convenience.*

**Group 1 . . . . . For vivid spring and fall color . . . . . \$14.25**

- |   |  |
|---|--|
| 2 Canadian Hemlocks . . . . . 4 to 5 ft.                | 1 Flowering Crab Apple Tree . . . 5 to 6 ft. |
